

CONCRETE PAVEMENT PRESERVATION

Thursday, March 29, 2018

12:00 - 1:00 pm

[College Avenue Commons \(CAVC\) Room 455](#) (Parking)

Larry Scofield, P.E.

Director of Pavement Innovation

American Concrete Pavement Association

&

Director of Engineering and Research

International Grooving and Grinding Association

Phoenix, AZ

About the Talk

Larry will talk about innovations in concrete pavement preservation and what is being learnt from the LTPP (Long Term Pavement Performance) SPS-2 Experiment. He will discuss new strategies for pavement preservation and provide an overview of lessons learned, training programs, and peer exchanges in the industry.

About the Speaker

Larry is a graduate from Arizona State University where he received both a Bachelor's and Master's degree in Civil Engineering. Larry retired from the Arizona Department of transportation where he worked for 29 years. While at ADOT, he worked in construction, materials, research, and pavement management. From 2005 to 2011, Larry worked for the American Concrete Pavement Association as Director of Pavement Innovation. In August of 2011, he began with the International Grooving and Grinding Association as the Director of Engineering and Research and Director of Pavement Innovation for the ACPA.

Refreshments provided by Graduate & Professional Student Association (GPSA). Event is open to the public.
